A. Lindsay Greer is Professor of Materials Science and Head of the Department of Materials Science and Metallurgy at the University of Cambridge. He has also held faculty positions at Harvard University, the Institut National Polytechnique de Grenoble, and the Centre for Materials Innovation, Washington University (St Louis). He is editor of *Philosophical Magazine* (founded in 1798, publishing papers on the structure and properties of condensed matter). He is well known for his work on metallic glasses. More broadly, his research interests are in microstructural kinetics, specifically on glass formation and crystal nucleation, in grain refinement in metallurgical solidification, in chalcogenide thin films for phase-change data storage and in electromigration. He has published more than 300 scientific papers.
