You may find some presentation guidelines for the student project listed here:

Intermediate Presentation (max. 10min + 5min discussion)

1. **Goal**
What do we want to achieve? and why (short)?

2. **Project Overview**
What are the main steps of the project?

3. **Project Progress**
What steps have been done so far?

4. **Methods**
Zooming into each step: How did you do it? What Bottlenecks did you encounter? How did you solve them (if it was possible)?

5. **Preliminary Results**
First reminding the audience of the actual goals (in general or of each step), then: what did you achieve so far?

6. **Conclusion and Next Steps**
Project Success Estimation, What else needs to be done? How can the group help?

Final Presentation (max. 20min + 10min discussion)

1. **Introduction**
1.1 Goal
What do we want to achieve?

   1.2. Motivation
Why do we want to achieve it?

   1.3 State of the art
What alternatives/similar things already exists?

(Motivation and state of the art can be interleaved)

2. **Project Overview**
What were the main steps in the project?

3. **Methods**
Zooming into each step: How did you do it? What Bottlenecks did you encounter? How did you solve them?

4. **Results**
First reminding the audience of the actual goals, then: what did you achieve?

5. **Critical Assessment**

6. **Conclusion and Outlook**
What else needs to be done? How can the group help?
